To Whom It May Concern:

The Chaffey Joint Union High School District (CJUHS) made a bold decision last year to implement document technology in our core classrooms. After review of several products, only the HoverCam T3 document camera proved to be a viable candidate with price and warranty terms offered. We purchased 850 units with Technology in Education after piloting a small quantity at a school site.

We had a successful launch last year because of the prompt fulfillment of our purchase and the district leadership training provided by Technology in Education free of charge. Teachers are using the technology on a daily basis to enhance instruction and are pleased with the product. As the district representative to train and support teachers in using HoverCam T3, I can also attest that I have received great support from HoverCam whenever I have called upon them.

In summary, HoverCam delivers and understands the needs of its cliental. Over 25,000 students are benefitting from this company because of its commitment service and high standards.

Sincerely,

Rick Wiersma

Director, Student Support & Staff Development
